Professional Summary

Final-year B.Tech (CSE) student and aspiring Data Science / ML Engineer with 6 months of hands-on internship experience in Machine Learning, NLP, and AI Agents. Skilled in Python, Pandas, NumPy, Matplotlib, Seaborn, and FastAPI, with NLP and computer vision projects built end-to-end, from data analysis to a working API or application. Completed a structured 6-month training in AI, Data Science, Data Analytics & Machine Learning.

Technical Skills

Languages: Python, SQL
Data Handling & Visualization: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Frameworks & Libraries: FastAPI, Django, OpenCV, MediaPipe
AI / ML: Machine Learning, NLP, Computer Vision, AI Agents, LLM Integrations, Data Analytics
Web: HTML, CSS
Database: MySQL
Tools & Platforms: Jupyter, VS Code, Git, GitHub

Work Experience

AI & Data Science Intern - Annova Solutions Pvt. Ltd. Nov 2025 - May 2026

- Worked on AI Agents, Data Science, and Machine Learning projects in a professional, production-oriented environment.
- Applied Python and ML libraries (Pandas, NumPy, Scikit-learn) to analyze and solve real-world business data problems.
- Built and tested AI-based agent pipelines and automated workflows, integrating LLM and automation tools.
- Collaborated with cross-functional teams, demonstrating strong self-learning ability and development discipline.

Projects

AI Answer Sheet Checker | Python, NLP, FastAPI GitHub

- Built an AI tool using NLP techniques to automatically evaluate student answer sheets against model answers.
- Designed a REST API with FastAPI, enabling teachers to upload answer sheets and receive results instantly.
- Reduced manual evaluation effort by automating the scoring pipeline end-to-end.

Drowsiness Alert System for Students | Python, OpenCV, MediaPipe, NumPy GitHub

- Built a real-time drowsiness detector that tracks eye landmarks from a webcam feed using MediaPipe and OpenCV.
- Added an auto-calibration step so detection adapts to each user, with an alert when drowsiness is detected.

Smart Expense Tracker | Python, Pandas, Matplotlib GitHub

- Developed a CLI application for adding, viewing, and categorizing expenses with CSV-based data persistence.
- Auto-generated monthly spending bar charts using Matplotlib for quick visual insights into spending patterns.

Education

LNCT Bhopal, Indore Campus 2023 - 2027 (Final Year)
Bachelor of Technology (Computer Science Engineering)

Certifications

AI, Data Science, Data Analytics & Machine Learning Oct 2025 - Apr 2026
CodeBetter Institute, Indore | 6-Month Structured Training Program

Soft Skills & Languages

Soft Skills: Problem Solving & Critical Thinking, Team Collaboration, Time Management, Self-motivated & Quick Learner
Languages: Hindi (Advanced/Native), English (Professional Working Proficiency)
